## How to set a howard miller westminster chime clock

OPERATING INSTRUCTIONS FOR QUARTZ WESTMINSTER MELODY MOVEMENT PRIMARY SETUP INSTRUCTIONS Remove the cover (if any) from the back of the clock to reveal the movement battery compartment. BEFORE INSTALLING BATTERIES, SET THE TIME TO 5:50. Install three new, fresh "AA" size alkaline batteries in the battery holders according to the (+) and (-) symbols in the holders. Turn the TIME SET wheel so the hands are moving CLOCKWISE to set the clock hands to the correct time assuming you were starting at 5:50 AM. Your clock will now be striking the correct amount of times for each hour. HOW TO USE THE "CHIME SET" BUTTON HOURLY STRIKE SETTING If you followed the instructions above, you should not have to perform the following. ALWAYS TURN THE TIME SET WHEEL SO THE HANDS ARE MOVING CLOCKWISE! Slide the CHIME ON/OFF switch to the music note position. TIME SETTING CONTROL Each time the CHIME SET button is pressed the number of strikes increases by one count. Continue pressing the CHIME SET button repeatedly until the number of strikes matches the current hour. For example, if the current time is 8:22, press the CHIME SET button until the clock strikes 8 times. 2. After setting the chime, if you find that the clock does not chime during the day, but does chime at night, press the chime set button 12 times to adjust the chime settings from a.m. to p.m. NOTE: The clock has an automatic nighttime silencing feature which silences the chime and strike between 10:01 p.m. and 5:59 a.m. VOLUME ADJUSTMENT Turn the VOLUME CONTROL knob to adjust the volume of the chime. CHIME SILENCING Slide the CHIME ON/OFF SWITCH to the crossed-out music note position to turn off the hourly chime and strike. BATTERY REPLACEMENT If the clock stops, begins to lose time or the chime becomes weak or erratic, it is usually the indication of weak or exhausted batteries. Replace the batteries following the instructions above for PRIMARY SETUP INSTRUCTIONS. Never leave exhausted batteries in the clock as they can leak and damage the clock. NOTE: Any time the batteries are removed from the clock, the chime must be reset as described in the HOURLY STRIKE SETTING section. autoradio 2 image by Nathalie P from Fotolia.com The clock in your Chrysler will need to be re-set at least twice a year due to seasonal time changes. It will also need to be adjusted if the car's battery drains or the radio malfunctions. When this happens, you can quickly correct the clock and have it display the accurate time. In most Chryslers, the procedure simply involves pressing a few buttons on the radio panel. Insert the key in the ignition and turn it to the "Accessories" setting. Turn on the radio. Press the "Sel" button on the far right of the radio. Push the "Sel" button once. Press the "Tuning" button up or down to change the hour. Push the "Sel" button once again. Press the "Tuning" button up or down to change the minute. Wait one or two minutes for the display to default back to the radio settings. Can you fix an overwound clock? How do I make my clock chime louder? What are the three winding holes on a clock? How do you balance a pendulum clock? What is a Westminster chime clock? How do you wind a 3 KEY clock? Why won't the pendulum swing on my clock? How do you set the clock on a Seiko wall? How much is a grandfather clock worth? How do you wind a 2 hole clock? How do I change my clock speed? These instructions are written for the: 625628 Braxton Wall Clock 625595 Reese Wall Clock 625603 Mia Wall Clock 635186 Holden Mantel Clock Howard Miller Westminster Melody Operating Instructions OPERATING INSTRUCTIONS FOR QUARTZ WESTMINSTER MELODY MOVEMENT that use 4 "AA" Batteries. PRIMARY SETUP INSTRUCTIONS BEFORE INSTALLING BATTERIES, SET THE TIME TO 5:50. Install four new, fresh "AA" size alkaline batteries in the battery holders according to the (+) and (-) symbols in the holders. Turn the TIME SET wheel so the hands are moving CLOCKWISE to set the clock hands to the correct time assuming you were starting at 5:50 AM. ALWAYS TURN THE TIME SET WHEEL SO THE HANDS ARE MOVING CLOCKWISE! Your clock will now be striking the correct amount of times for each hour. If you followed the instructions above, you should not have to perform the following. HOURLY STRIKE SETTING (SET Button) - This sets the chime count to the time displayed on the clock. Each time the CHIME SET button is pressed the number of strikes increases by one count. Continue pressing the CHIME SET button repeatedly until the number of strikes matches the current hour. For example, if the current time is 8:22, press the CHIME SET button until the clock strikes 8 times. You will hear the chime start to play each time you push the set button UNTIL you reach 11:00 PM (10:00 PM is the last chime of the night). Keep pressing and counting during these "night-off" hours. It will resume playing again when you reach 6:00 AM. After setting the chime, if you find that the clock does not chime during the day, but does chime at night, press the chime set button 12 times to adjust the chime settings from a.m. to p.m. NOTE: The clock has an automatic nighttime silencing feature which silences the chime and strike between 10:01 p.m. and 5:59 am. BATTERY REPLACEMENT If the clock stops, begins to lose time or the chime becomes weak or erratic, it is usually the indication of weak or exhausted batteries. Replace the batteries following the instructions above for PRIMARY SETUP INSTRUCTIONS. Never leave exhausted batteries in the clock as they can leak and damage the clock. NOTE: Any time the batteries are removed from the clock, the chime must be reset as described in the HOURLY STRIKE SETTING section. Español Français Deutsch FOLLOW THESE STEPS TO SET UP WALL AND MANTEL CLOCKS. • SETTING UP YOUR CLOCK Located in the shipping carton with the clock will be a key to wind the clock. If provided on your model, the shipping carton may also include a pendulum and finial that are separately packed. Please keep all of the original packaging material. WARNING: KEEP PLASTIC BAGS AND SMALL PARTS AWAY FROM CHILDREN. Access to the clock movement and chimes is made through the back of the clock. Howard Miller uses a combination of rubber bands, foam, styrofoam, metal, and cardboard to secure the movement and chimes during shipping. Cut rubber bands with scissors and discard. DO NOT PULL ON THE RUBBER BANDS TO BREAK. Remove foam, styrofoam, and cardboard from around the movement and chimes. When possible, pull in the direction shown to remove. (See figure 1 & 2) For clocks with a pendulum, cut the rubber band or remove the metal spring clip from the back side of the movement by first pulling one end free. (See figure 2). Open the front door and remove the white plastic insert holding the minute hand at the 3:00 location (this insert is not used on all models). Follow the remaining instructions as they apply to your clock. • FOR CLOCKS THAT HAVE A PENDULUM - Follow these instructions for hanging pendulum. NOTE: To perform the following steps, Howard Miller suggests wearing cotton gloves or using a soft cloth when handling parts. Some pendulums have a colored protective plastic film covering the pendulum disk. Carefully remove this film before hanging the pendulum. To hang the pendulum, locate the pendulum guide through the front door or back access panel. While holding the pendulum guide with one hand, slip the pendulum through the front door with your other hand. Place the pendulum hook over the pin or through the slot on the end of the pendulum guide, and lower the pendulum until it is hanging securely on the pendulum guide. (See figure 2). • FOR CLOCKS THAT HAVE HANGING WEIGHTS Follow these instructions for hanging weights. Do not remove the styrofoam blocks operating for at least eight (8) hours. Check the weights to ensure that they are tightly assembled. Check to make sure that the cable is in the cable pulley. Hang the weights on the pulley. (See figure 3). WALL AND MANTEL CLOCK English 1-5 6-18 - until after your clock has been 1 BACK PLATE CHIME RODS CHIME HAMMERS FIGURE 1 PULL TO REMOVE FOAM CHIME HAMMERS CHIME RODS FIGURE 2 FIGURE 3 TIME ADJUSTMENT LEVER PULL TO REMOVE FOAM SUSPENSION SPRING SPRING CLIP PENDULUM GUIDE PENDULUM Atomic clocks are the most accurate timepiece you can own. Because of the way they operate and how well they run, you can depend on their precision. You rarely have to set them yourself. When the clocks are changed during the fall and spring, the work is already done.How an Atomic Clock OperatesSometimes called radio controlled clocks, atomic clocks are set and run from a signal originating from Fort Collins, Colorado. The signal is sent from a transmitter at the National Institute of Standards and Technology. An antenna and receiver on each clock allow it to receive the signal. The first thing you will have to do is select the correct time zone that you are located in. The clocks do adjust for daylight saving time. If you live in an area that does not participate in the daylight savings time change, you will have to disable the clock for that period or make the adjustment after the clock has updated.How to Set Time on an Atomic ClockIf there is a glitch in the signal and your atomic clock is no longer accurate, you can take steps to set it yourself manually. Start with a search for an online atomic clock instruction manual. You should be able to find the information by conducting a search on the Internet for "How to set time on an atomic clock."Who Makes Atomic ClocksThere are a few manufacturers that make the atomic clock models, with the most notable brands being Howard Miller, Seiko, Bulova and La Crosse. Each clock should have a default button on the back so that the clock can be set manually. Most operate on battery power.Benefits of an Atomic ClockSometimes, the clock may have time that isn't accurate. This can happen if it is located in a place that does not pick up a clear signal because something is blocking it, or it is facing in a location that doesn't create a path for the transmission. The time on the atomic clocks is so accurate that they are synced with other electronics like computers, smartphones and other precise ways to tell time.Where to Purchase an Atomic ClockAtomic clocks can be purchased most places that carry any other timepieces. Retail stores and jewelry stores and other places that carry clocks and watches will most likely have an atomic clock or two in stock as well for purchase. If you tell them that is what you are interested in, they should be able to suggest a model based on your information. They can be found in tabletop models, wall models and trustworthy accurate alarm clocks. MORE FROM QUESTIONSANSWERED.NET
